MATERIALS AND FINISHES

20L and 30L bins

Body made of stainless steel AISI 304L, with a 0.8 mm thickness. The outer face is polished and satin finished, while the interior face is matt finished. On the interior of the body 2 cylindrical pieces allow reclining the lid and inner handle. The inner handle is made of zinc plated iron and has a U shape to ease the trash-bag fastening.

Cover lids of both models are made of 1.2 mm thick steel. They are cataphoresis-treated and are afterwards powder-coated with epoxy powder 80 micron 30% matte, available in several finishes: silver RAL 9006 and the recycling stream colors: green RAL 6000, yellow RAL 1004, beige RAL 1019 and blue RAL 5000.

The lid visually covers the trash, which can be thrown through a square hole of 120x120mm. The base is made of black ABS. A latticed and ribbed inner side provides rigidity to the bin, and a smooth outer side with 4 cavities to place 4 rubber anti-slip blocks.

Volume small bin: 20L and volume big bin: 30L.

50L and 90L bins

Body made of stainless steel AISI 304L, with a 0.8 mm thickness. The outer face is polished and satin finished, while the interior face is matt finished. On the interior of the body 2 cylindrical pieces allow reclining the lid and inner handle. The inner handle is made of zinc plated iron and has a U shape to ease the trash-bag fastening.

Cover lids of both models are made of 1.2 mm thick steel. They are cataphoresis-treated and are afterwards powder-coated with epoxy powder 80 micron 30% matte, available in several finishes: silver RAL 9006 and the recycling stream colors: green RAL 6000, yellow RAL 1004, beige RAL 1019 and blue RAL 5000.

The lid visually covers the trash, which can be thrown through a square hole of 170x170mm. The base is made of stainless steel and fixed to the body. It allows the bin to be fixed to the floor. These models also allow joining several bin modules by using the provided hardware.

MAINTENANCE

Clean with a damp cloth with mild soap and water. Rinse and dry with a dry cloth. Avoid using abrasive products.
